

Wind Turbines With over 20 years of experience installing wind and solar throughout NZ and Pacific we have a wide range of wind turbines to suit your power needs. Our wind turbines have been selected to suit New Zealand ...

Harness the power of the wind to generate green energy for your home or project! At up to 1000 W power while only 1.50 m in diameter and 19 kg in weight, the SkyWind NG is the perfect solution for your project. From a start-up idea in ...

Inside the micro wind turbine, the generator takes the spinning from the blades and turns it into electrical power. This happens through an electromagnetic process where the spinning blades make electrons move, creating electricity. ...

We found the PowerPod compact home wind turbine on a Kickstarter campaign, which looks great in principle, but having seen a few home wind turbines in the past that failed to deliver on their promises, we thought it ...

Wind and solar generation is renewable and inexhaustible and offers long term energy-generation stability. Wind or wind-and-solar power systems are available for homes, farms and businesses that want to generate their own power or ...

One fuel cell will power a small home. Two fuel cells will power a larger home. The Oncore Energy modular system allows you to expand and scale. Clean Energy - Oncore Energy MicroGrid fuel cell uses hydrogen to produce clean, ...

For the majority of property owners living in urban areas, installing wind turbines on or close to buildings with overall windspeeds of less than 5m/s is probably not a realistic proposition. ...

Energy from wind, generated right where you need it - that's our SkyWind NG. The first independently tested micro wind turbine is efficient, quiet and Made in Germany. Our all-metal design is robust, reliable and proven in thousands of ...

German household micro wind power generation
