Glassenbury, a 40MW BESS project and among Gresham House's earliest investments in the space. The firm's fund is the largest owner of operational BESS in the UK. Image: Gresham House. UK battery energy storage system (BESS) owner-operator Gresham House Energy Storage Fund has put a 50MW/50MWh project into commercial operation in ...

The 50MW portfolio, which is now grid connected, spans two sites including a 40MW battery park in Glassenbury in Kent and a 10 MW battery park located at Cleator in Cumbria. The two sites secured contracts as part of 2016's 200MW National Grid Enhanced Frequency Response (EFR) auction, and will deliver a quarter of the auction's capacity.

The acquisitions follow Gresham House growing its portfolio by 35MW in January through the acquisition of the 25MW battery-only Tynemouth site and the completion of its Glassenbury B extension. Last year was also busy for the storage fund, finishing the year with the acquisition of the 50MW Wickham and also 50MW Thurcroft batteries.

It outlined how it anticipates that the net proceeds of this initial placing and drawings under its debt facilities will fund the majority of a 747MW existing battery storage ...

Glassenbury, one of Gresham House's UK battery storage projects. Image: Gresham House. Gresham House, a stock exchange-listed investor in battery storage in the UK and Ireland, has said the majority of its development pipeline projects could have at least two hour durations of storage when built.

Octopus Energy has signed a two-year fixed-price tolling agreement with Gresham House Energy Storage Fund for 500MW of its battery assets, bringing the utility's virtual power plant (VPP) portfolio to over 1.5GW.
