RWE Renewables' first European-based battery storage project has entered full operations in Ireland. The 8.5 MWh battery storage facility will be capable of providing a rapid delivery of electricity into the power grid in order to balance fluctuations resulting from the growing proportion of electricity generated by intermittent renewables.

In 2020, we announced our ambition to run on 24/7 carbon-free energy on every grid where we operate every hour of every day by 2030. This builds on our longstanding commitment to global renewable energy purchasing. Since then, we've been working hard to transition our operations and the electricity grids that serve us to cleaner sources of power, ...
