

New Zealand is proud to share its geothermal expertise with Indonesia, a nation with extraordinary geothermal potential," said Cecilia Shand, New Zealand Trade Commissioner to Indonesia. "As both countries navigate their energy transitions, the collaboration between Indonesia and New Zealand is a model of mutual benefit.

Our Auckland Distribution Centre in New Zealand and Melbourne Distribution Centre in Australia resoundingly activate our sustainable design leadership with: Sustainable Energy Generation Solar panels, LED lights, light timers and ...

The New-Zealand Japan Geothermal Coalition. A Memorandum of Understanding (MoU) was signed between New Zealand's GNS Science, Geo40, and Western Energy, and Japan's Mitsubishi Gas Chemical Company (MGC). The MoU streamlines collaboration and knowledge sharing between the parties, leveraging the shared expertise to ...

Most of New Zealand's energy is supplied by fossil fuels, including 99% of transport energy, and around 60% of industrial energy. Much of our electricity is generated from renewable energy sources (80-85%), which is promising for reducing our reliance on fossil fuels in the future.

New Zealand's energy emissions are dominated by liquid fuels. These account for over half of all energy sector emissions, and have been steadily increasing since 1990. Gas and coal make up most of the remainder, with biomass and fugitive emissions contributing only a small percentage of total energy sector emissions.

Australian headquartered GPC Asia Pacific will centralise five of its Auckland-based automotive parts distribution centres into a new \$34 million hub in Wiri to cater to "exponential" growth of online sales. The US-controlled firm operates 115 branches of car parts retailers Repco and NAPA employing about 1,000 people across New Zealand.

Genuine Parts Company Asia Pacific (GPC), parent company of Repco, NAPA, and Motion businesses, has finished building new 29,000sqm distribution centre that will help serve the growth in its automotive and industrial parts businesses.

Solar panels, advanced energy control systems, and rainwater collection also target significant energy footprint reduction." ... The property is occupied by, and serves as the New Zealand distribution centre for, GPC, a leading Australasian distributor of automotive and industrial parts with an extensive network of over 10,000 locations ...

To further support your energy, focus, and cognitive goals, consider pairing Alpha-GPC with these complementary products from Switch Nutrition range: NMN (Nicotinamide Mononucleotide): NMN is known

for its potential to enhance energy production and overall vitality. NMN supports cognitive energy as well as physical energy at a cellular level.

Ormat Technologies (Ormat) has been awarded the Engineering, Procurement, and Construction (EPC) contract valued at approximately \$200 million by Contact Energy for the development of the 101-MW Te Mihi 2 geothermal power plant in New Zealand. The power plant is expected to be completed by mid-2027. Construction of the Te Mihi 2

New Zealand Parliament Member and Resources and Regional Development Minister Shane Jones expressed strong support for the expansion of geothermal energy utilization in the country during the recently held New Zealand First conference. During his speech, Jones declared that funding would be sought to develop "a new frontier of development and use the geothermal ...

A new report prepared by GeoExchange NZ Limited (GeoExchange) for the Bay of Plenty Regional Council (BOPRC) highlights the potential of the Tauranga Geothermal System in New Zealand for geoheat applications. The full report, "GeoHeat Potential of the Tauranga Geothermal System," can be accessed directly via this link or at

Repco pioneered the automotive parts aftermarket in Australia and New Zealand and for the last 95 years has been one of the region's most widely recognised and trusted brands. Repco's dual format structure services trade and retail, and with a network of 6 distribution centres in every state in Australia, we enjoy a remarkable competitive advantage.

Solar panels, advanced energy control systems, and rainwater collection also target significant energy footprint reduction." ... In New Zealand, GPC's business is well known through the Repco, NAPA and MOTION brands that are familiar to all car enthusiasts. A rapid-growth Fortune 500 company, GPC is listed on the New York Stock Exchange.

New Zealand Energy Corp is an onshore producing oil and gas company with substantial permitted acreage for new oil and gas production opportunities in New Zealand's only producing sedimentary basin, the Taranaki. With a 50% ownership stake in the Waihapa production station, NZ Energy Corp can quickly tie in any near-term production and sell ...

A new publication by GNS Science highlights the potential for supercritical geothermal development in New Zealand. The resource can viably provide up to 2000 MW of electricity generation capacity by 2050, which can contribute approximately 35% of New Zealand's energy needs. We first reported on the research initiative of GNS
