Day 5: Tundra, mountains, and icebergs. As we approach Greenland, we may sail through the sea ice into Foster Bay and land at Myggebugten. Beyond the old hunters' hut (where Norwegian trappers hunted for polar bear and Arctic fox in the first half of the 20th century), there is a sprawling tundra populated by musk oxen, with geese floating the small lakes.

While Africa's resource endowment and solar potential are undeniable, the continent faces numerous challenges in its efforts to develop a solar PV manufacturing sector. The global solar PV value chain is characterized by high levels of market concentration, with a few countries--chiefly China--dominating production.
