

Note to editors. Gas Storage Europe (GSE) represents the interests of 32 Storage System Operators with around 100 storage sites in 16 countries in Europe, representing approximately 79 BCM, i.e. 88% of EU technical storage capacity. GSE is one column of GIE, Gas Infrastructure Europe, the European association of the Transmission, Storage and LNG terminal Operators.

According to AGSI, the storage transparency platform of Gas Infrastructure Europe (GIE), 95% of filling level can cover on average 28% of the EU's annual gas consumption, with some variations at national level. With 58% of filling level, Latvia, which has one of the most extensive storage capacities compared to its population size, can ...

The Storage Database is the base of the Storage Map. It shows the operational data such as working gas volume, injection and withdrawal capacities of storage facilities as well as the under construction and planned storage sites. The database is available in an open format and includes also details on the operators and facilities.

GIE will organise a Transparency Roundtable Workshop on these new AGSI / ALSI developments in March. Please subscribe to our mailing list to stay updated. About ALSI and AGSI: On AGSI, 60 storage system operators (SSOs) are currently providing daily inventory reporting on 161 storage facilities in 20 European countries. In EU27, storage ...

Information regarding the gas storage fill rate and LNG capacities shown were obtained from the GIE AGSI and ALSI platforms respectively. This map is published jointly with ENTSOG. The System Capacity map was first published in 2024 and combines the information from the former System Development and Transmission Capacity maps.

Note to editors. Gas LNG Europe (GLE) currently gathers 14 European LNG terminal operators from 9 countries, representing around 90% of all the existing LNG regasification capacity in Europe. GLE is one column of GIE, Gas Infrastructure Europe, the European association of the Transmission, Storage and LNG terminal Operators.

Gas Storage Europe's Aggregated Gas Storage Inventory (AGSI+) said European stock levels for both January and February 2020 were the highest ever recorded for those months, which it said are the result of growing natural gas imports by pipeline and as LNG, and a mild winter, which limited winter heating demand. ...
