Grid-tied solar systems. Grid-tied systems are solar panel installations that are connected to the utility power grid. With a grid-connected system, a home can use the solar energy produced by its solar panels and electricity that comes from the utility grid. If the solar panels generate more electricity than a home needs, the excess is sent to the grid.

The Expandable 1.8KW Solar Grid-tie Kit is an innovative and affordable solar energy solution for the homeowners who want to save money on energy bills and at the same time save the environment. ... 324 S.
