

SACRAMENTO -- New data show California is surging forward with the buildout of battery energy storage systems with more than 6,600 megawatts (MW) online, enough electricity to power 6.6 million homes for up ...

Californian solar generation has increased twentyfold between 2012 and 2022, and according to the California Energy Commission, in 2021, 37% of the state's electricity came from solar and wind. As with other recent and ongoing projects in Clearway's portfolio, the battery energy storage system (BESS) equipment was supplied and integrated by ...

The CPUC in California has determined that the state needs 10.6GW of new long lead-time resources, including 2GW of LDES. Skip to content. Solar Media. ... (CPUC) has proposed the procurement of over 10GW of new energy resources, including 1GW of multi-day long-duration energy storage (LDES) and another 1GW of 12-hour-plus LDES. ...

3 ???· SACRAMENTO -- The California Energy Commission (CEC) today approved a \$42 million grant to build a long-duration energy storage project at Marine Corps Base Camp ...

From 2010 to 2020, California went from producing 3.4% to almost 22.7% of its energy from solar and wind plans to keep building on that momentum, and anticipates building an additional 16.9 GW of solar and 8.2 GW of wind by 2030 to meet energy demand and avoid blackouts during multi-day heatwaves such as the one the state is currently experiencing.

ORMAT TECHNOLOGIES EXPANDS ENERGY STORAGE FOOTPRINT IN CALIFORNIA Signs Resource Adequacy Agreements Totaling 5mw/20mwh with Two California Community Choice Aggregators RENO, Nev. October 01, 2020, Ormat Technologies, Inc. (NYSE: ORA) today announced that it has signed two Resource Adequacy Agreements, each for 50% ...

SACRAMENTO - California's battery storage capacity has expanded rapidly, increasing by 3,012 megawatts (MW) in just six months to reach a total of 13,391 MW. This growth marks a 30% increase since April 2024, underscoring the state's swift progress in building out clean energy infrastructure, especially during a summer marked by record-breaking heat.

A 230MW battery energy storage system (BESS) from NextEra Energy Resources, part of a large solar-plus-storage project, has come online in California. The Bureau of Land Management (BLM), which manages the land ...

A site map of the proposed project in Kern County, California. Image: Kern County Planning and Natural

Resources Department. The Kern County, California hybrid facility will have the capability to generate up to 2GW of solar power co-located with up to 2GW of battery energy storage system (BESS) capacity, spanning approximately 12,875 acres of privately ...

Developer Squadron Energy is seeking to build an 8-hour duration 1,200MWh battery energy storage system (BESS) in New South Wales, Australia, co-located with a 300MW wind project. Fengate, Alpha Omega Power and US Bancorp close tax equity deal for 400MWh California BESS

3 ???· As of October, installed battery energy storage capacity in California had reached more than 13 GW. Energy storage will be critical for the state to reach its long-term carbon neutrality and emissions reduction goals while maintaining critical grid reliability and resiliency. The EVLO project will also support the state's progress toward its ...

The utility-scale renewable microgrid will be built on tribal lands near Alpine, California, just east of San Diego. Indian Energy, a 100% Native American-owned energy development firm is developing the project, which will include a 15-MW solar array and a 38-MWh battery long-duration energy storage system (LDES).

Scalable, modular, and durable, our suite of premium energy storage systems are built for every environment, from the most remote site to a dense metropolis and everything in between. And you don't need to worry about selecting the right one; our expert team will work directly with you to identify your exact needs and tailor the ideal ...

The utility is committed to carbon neutrality by 2045, in line with targets set into law by California Governor Gavin Newsom covered in Energy-Storage.News last year. In April of this year, CAISO announced that it had surpassed 10GW of connected battery storage capacity which Governor Newsom hailed as an "energy storage revolution."

6 ???· California policymakers have set a target to produce 100% of the state's electricity from carbon-free sources by 2045, if not sooner, and energy storage is considered a key piece ...

Long-time readers of Energy-Storage.news over the past 10 years will recall that as California's AB2514 legislation put in place a mandate for the IOUs to procure 1.325GW of energy storage between them by 2020, an outsized portion of our reporting was driven by activity in the California Independent System Operator (CAISO) bulk power system.
