

# Guernsey papago storage project

Who financed the Papago storage project?

Recurrent Energy, owner of the project, secured a 20-year tolling agreement with Arizona Public Service (APS) for the energy storage project, under which the utility pays for the right to charge and discharge the battery when it needs to. MUFG and Nord/LB acted as coordinating lead arrangers for the Papago Storage project financing.

When will Papago storage be operational in Arizona?

The 1,200 MWh Papago Storage, which will be the largest energy storage project in Arizona, is expected to begin operations in the third quarter of 2024, with commercial operations slated for the second quarter of 2025. Once operational, the project is expected to dispatch enough power for approximately 244,000 homes for four hours every day.

How many homes will a 1200 MWh Papago storage project serve?

The 1,200 MWh Papago Storage project will dispatch enough power to serve 244,000 homes for four hours a day with the e-Storage SolBank high-cycle lithium-ferro-phosphate battery energy storage solution. Recurrent's 1,400 MWh Crimson project in California. Image: Recurrent Energy
