What happens if a Warframe has zero mod capacity?

At zero mod capacity you will start the mission with the warframes starting energy amount. Each capacity point after zero will give you an additional five energy. This energy is capped by a warframes maximum energy capacity, or the maximum amount of energy a warframe can carry. For most warframe's this energy cap will be 150.

How much energy can a Warframe carry?

This energy is capped by a warframes maximum energy capacity, or the maximum amount of energy a warframe can carry. For most warframe's this energy cap will be 150. If you wanted to start a mission with 150 energy then you would need 20 capacity left after modding, if your warframe starts with a base of 50 energy.

How much does a Warframe power cost?

Most powers cost 25 for first ability, 50 for second ability, 75 for third ability and 100 for the warframes fourth ability. These cost will differ from warframe to warframe, but that is the general basic cost for powers. If you do not have the energy to pay for using the ability you can not use the ability.

What is the energy cap for a Warframe?

For most warframe's this energy cap will be 150. If you wanted to start a mission with 150 energy then you would need 20 capacity left after modding, if your warframe starts with a base of 50 energy. A simple formula is Starting energy + (5 x remaining capacity). In this case its  $50 + (5 \times 20) = 50 + 100 = 150$ .
