Who is IBS intelligent battery system?

IBS Intelligent Battery System GmbH develops, manufactures and distributes electronic systems and modules for the 12V and 24V battery market. 15 years of experience in battery technology and microelectronics have led to a wide range of versatile products.

What are the applications of IBS intelligent battery system?

Applications include: off road, Rally, county travelling, police, military, utility and emergency vehicles. IBS Intelligent Battery System - the ultimate battery technology!

What is an intelligent battery sensor (IBS)?

An intelligent battery sensor (IBS) is a device that assumes a key role in successful energy management. It measures the current, voltage, and temperature directly at the battery. These measurements are the input data for the advanced battery algorithm that supplies the following information:

What is a 12 volt battery monitoring system (IBS)?

(IBS) to perform additional monitoring of the 12 volt electrical system and status of the 12 volt vehicle battery. In cases when the IBS detects charging system failure, or the 12 volt vehicle battery conditions are deteriorating, electrical load reduction actions will take place to extend the driving time and distance of the vehicle.
