How has Iran's energy sector changed over the past three decades?

Iran's energy sector has experienced significant changes over the past decades. Because of easy access to fossil energy resources, the total final energy consumption during the past three decades has increased from less than 350 to more than 1300 million barrels of oil equivalent (BOE).

At Ad Terra Energy, we use our expertise and knowledge of the Earth's subsurface to support our clients and partners in their efforts to produce geothermal energy. The skills and equipment needed for exploring and developing oil and gas reservoirs are complementary to those needed for geothermics. As a result, we are able to provide the most ...

In order to offer our clients geothermal advice based on real field experience, Ad Terra has initiated Swiss Geo Energy: a geothermal exploration, development and production project designed with both sustainability and cost-efficiency in mind. The goal is to transfer skills and apply our extensive experience gained from traditional energies to ...
