How much natural gas did Iraq produce in 2022?

Iraq consumed significantly more natural gas than it produced in 2021, primarily for electric power generation. The country also flared over 630 billion cubic feet (Bcf) of natural gas in 2022 due to inadequate pipeline and processing infrastructure, making it the second-largest flaring country globally.

How can Iraq address its current electricity shortfall & growing power needs?

BAGHDAD - Iraq, one of the world's biggest energy producers, can address its current electricity shortfall and growing power needs through immediate action to relieve pressure on the system, according to an in-depth report published Thursday by the International Energy Agency.

What percentage of Iraq's electricity comes from natural gas?

Nearly all (about 98%) of Iraq's electricity generation is from oil and natural gas.<sup>62</sup> Natural gas use in the electric power sector increased after 2016 because Iraq began importing natural gas from Iran to increase its own supplies. Hydroelectricity accounts for most of the remaining share of electricity production.<sup>63</sup>

Does Iraq have natural gas?

Iraq's proven gas reserves are the twelfth-largest in the world, but the country lacks the means to efficiently capture natural gas and leverage the resource into electricity. The country flares huge quantities of methane gas associated with oil and gas extraction.

How many thermal power plants does Iraq have?

Since 2021, Iraq has started operating three thermal power plants with a combined capacity of 2.6 GW, and Iraq has plans to add 6 GW of new generation capacity by 2025. Iraq also plans to increase the energy efficiency of existing plants and other electric power sector infrastructure.<sup>64</sup>

Is foreign help enough to fix Iraq's energy problems?

Foreign help is not enough to fix energy issues, domestic reform is necessary. This past July, Iraq and France's TotalEnergies finalized the Gas Growth Integrated Project, a \$27 billion energy deal aimed at Iraq's natural resources and improving the country's electricity supply.

Iraq holds the 12th largest natural gas reserves in the world, estimated at 131 trillion cubic feet (Tcf) at the end of 2022, predominantly located in large oil fields in the south and mostly associated with oil production. Despite these substantial reserves, Iraq faces regulatory, investment, and infrastructure challenges, which have kept natural gas production largely unchanged since 2016. The majority of Iraq's natural gas, about two-thirds, is produced as a by...

Iraq has struck a major deal with France's TotalEnergies company, bringing in \$27 billion in foreign investment to build up natural resource development and electricity supply. Iraq has long desired greater
