

Ironridge bx Peru

What is ironridge BX?

IronRidge® BX delivers superior power density and design flexibility to flat roof solar arrays. Made of a glass reinforced composite, the BX Chassis is engineered for extreme structural loading, yet is also shaped to be roof-friendly and easy to install. Corrosion-free and engineered for long-term structural performance.

Does ironridge have a Class A rating?

Therefore, the rating is applicable to any module to roof gap. IronRidge is currently Class A certified for Flush Mount applications parallel to roof with Type 1 and 2 modules. Tilt Mount systems are certified with Type 1 modules. What if I have a Class C roof, but the jurisdiction now requires Class A or B?

What does the ironridge listing cover?

IronRidge systems have been fully listed to the UL 2703 standard by Intertek Group plc. UL 2703 is the standard for evaluating solar mounting systems. It ensures these devices will maintain strong electrical and mechanical connections over an extended period of time in extreme outdoor environments.

Does the ironridge UFO cause galvanic corrosion?

The high quality stainless steel used in the IronRidge UFO does not cause significant galvanic corrosion, even in extreme environments. New language in the 2012 IBC states that a roof mounted photovoltaic system must have the same fire classification as the roofing material the system is installed upon. 2012 IBC: 1509.7.2 Fire classification.

Does ironridge UFO rust?

The UL 2703 certification process included extensive environmental and corrosion testing. The high quality stainless steel used in the IronRidge UFO does not cause significant galvanic corrosion, even in extreme environments.

incorporate safety requirements for rapid ...

IronRidge is a global leader in solar racking founded in the mid-1990's and has since supported the growth of the industry by developing code-compliant racking solutions for roof and ground mount solar installations. The company's racking components are designed and tested to withstand extreme weather conditions and are certified for compliance with the latest ...

The BX system is currently manufactured in the US and can contribute meaningfully to reaching the 40% Domestic Content minimum for C& I projects. Projects using our BX solution can qualify for the ITC Domestic Content bonus credit through the IRS guidance that was issued in May, 2023. ... IronRidge sources material through a global, diversified ...

Fronius and IronRidge are happy to partner for this informative live webinar where we discuss rapid shutdown requirements, UL 3741, and how both of our products play a part in the solution to comply without the need for MLPE. Join Paul Bui, Technical Sales Advisor for Fronius USA as he highlights: / Fronius Symo Advanced commercial string inverter

Ballasted flat roofs (BX) Ground based (GB) Product catalog. Attached Flat Roof Documents & Resources. ... IronRidge systems have been fully listed to the UL 2703 standard by Intertek Group plc. UL 2703 is the standard for evaluating solar mounting systems. It ensures these devices will maintain strong electrical and mechanical connections over ...

The IronRidge BX System is listed to UL 3741, in addition to UL 2703, offering more design flexibility. This includes the option to design without using MLPE devices, which can reduce material and installation costs. Refer to the BX Installation Addendum for instructions on how to design and build a UL-3741-compliant system.

OpenSolar's 3D design technology leverages the IronRidge Design Assistant tool for reaction forces and engineering. So, in addition to homeowner-facing digital sales tools, installers can also be guaranteed that designs are accurate, properly engineered, and permitted.

IronRidge Edge Clips (BX-CT-EC-PZ) and Cable Ties (BX-CT-UV-PZ) are wire management components that are evaluated to UL 1565 (wire positioning) and/or UL 62275 (cable ties) and are approved for use. They are part and the UL 3741 Listing. A listing of approved PV Hazard Control Equipment or components is provided in the UL 3741 Installation ...

Ironridge bx Peru

The IronRidge BX System is designed to meet the needs of commercial solar--navigating complex roof layouts, while also handling the most extreme environmental conditions. At the core of BX is the Chassis, a ballasted mount made of BASF Ultramid polyamides. They are exceptional for their high mechanical

All Modules listed in BX Module Compatibility Section with max module area of 30.5ft²; BX Components o 5 Deg BX Chassis (BX-5D-P1) o 10 Deg BX Chassis (BX-10D-P1) o Bottom Clamp (BX-BCL-M1) o Top Clamp (BX-TCL-XXMM-M1), where XX is 30 thru 46 BX Accessories o Bonding Jumper (BX-MB8-M1 and BX-RB38-M1)

BX CHASSIS Every component in the IronRidge BX Ballasted System has been tested to the limit and proven to endure. Our rigorous approach includes unique structural features, such as multi-dimensional clamps, 360[°] reinforcement, and a roof-friendly design. All of our products are fully-certified, code-compliant, listed

Join us as for a training on IronRidge's Ballast solution, BX. This will cover the benefits and features as well as installation of this product line. ...
