St Vincent and the Grenadines and St. Vincent Electricity Services Limited (VINLEC), the national utility, have a long history of utilizing renewable energy for electricity generation. Hydropower has been a part of the generation mix since the early 1950s, and in the late 1980s it represented half of the electricity produced by the utility.

The most recent projects are a 580kW PV and battery energy storage system on Union Island, which was commissioned in 2019, and a 100kW solar microgrid on Mayreau island, which was commissioned in February 2020. St Vincent and the Grenadines is comprised of the main island of St Vincent and a chain of smaller islands, not all of which are inhabited.

6. Petit St Vincent Island in The Grenadines. Another of the private islands in The Grenadines is Petit St Vincent which, at 115 acres in size, is 44 miles away from St Vincent.
