Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

The cells convert the sunlight into electricity, which can be used to run household appliances and lighting. These cells don't need direct sunlight to work - they can still generate some electricity on a cloudy day. Many properties in the Isle of Man are suitable for solar PV installations and you would be surprised how much energy you can ...
