Why is Israel aiming to increase energy generation from renewable sources?

Most countries are seeking to increase energy generation from renewable sources amid an escalating climate crisis that is warming the planet at an unprecedented pace. Israel's most recent target is to generate 40 percent of its electricity from renewable sources, mainly solar energy, by 2030.

Will Israel be able to generate 40 percent of its electricity?

Israel's most recent target is to generate 40 percent of its electricity from renewable sources, mainly solar energy, by 2030. A new, contentious climate deal accepted in November by almost 200 countries calls for an eventual end of some coal power and of fossil fuel subsidies.

Who makes electricity in Israel?

The Israel Electric Corporation, which traces its history to 1923, with the First Jordan Hydro-Electric Power House, is the main electricity generator and distributor in Israel. Petroleum exploration began in 1947 on a surface feature in the Heletz area in the southern coastal plain.

Does Israel have a diplomatic relationship with Newmed energy?

Israeli energy companies Enlight Energy and NewMed Energy, formerly Delek Drilling (part of Yitzhak Tshuva's Delek Group), announced a plan this week to jointly develop, bankroll, build, and manage renewable energy projects across the Middle East and North Africa, including in countries with which Israel does not have formal diplomatic ties.

How much energy does Israel use?

Most energy in Israel comes from fossil fuels. The country's total primary energy demand is significantly higher than its total primary energy production, relying heavily on imports to meet its energy needs. Total primary energy consumption was 304 TWh (1.037 quad) in 2016, or 26.2 million tonne of oil equivalent.

How important are Israel's natural gas discoveries?

The discoveries of the Tamar gas field in 2009 and the Leviathan gas field in 2010 off the coast of Israel were important. The natural gas reserves in these two fields (Leviathan has around 19 trillion cubic feet) could make Israel more energy secure.

The US-Israel Energy Center not only supports groundbreaking energy innovations but also fosters economic competitiveness and job creation. The program funds up to 50% of project budgets, from research and development through to ...

Advanced Energy announced the grand opening of a 6,500 square-foot facility in Caesarea, Israel that includes business offices, a service and repair center and R&D lab. The Fort Collins, Colorado-based company ...
