

Does Italy have a battery storage market?

This report is part of a series that analyses the battery storage market in select European countries. Italy has both a rapidly growing utility-scale market as well as a flourishing customer-sited battery storage market. Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives.

Why is battery-based energy storage important for Italy?

As Italy is advancing the decarbonisation of its power supply, decommissioning its coal fleet, and increasing the share of intermittent, non-synchronous renewables, battery-based energy storage is the most cost-effective and fast-to-deploy technology that provides additional capacity and flexibility to the grid.

When will Enel Green Power start building battery storage projects in Italy?

Image: Enel Green Power. Enel Green Power will start building 1.6GW of battery storage projects in Italy this quarter, with the country's utility-scale market expected to soar in the next three years. The renewables arm of multinational energy firm Enel said construction will begin between April and June this year.

How will Italy support energy storage?

Italy is one of Europe's fastest growing energy storage markets and recently introduced mechanisms to support this nascent sector. To meet its decarbonisation goals, it set out the need to build 9 GW of new grid-scale energy storage and upped its renewables targets with the aim of having 65% of electricity from green energy by 2030*.

How many GW of battery storage will Italy have by 2050?

The remaining 3-4 GW is expected to come from utility-scale systems. By 2050, Italy aims to achieve 30-40 GW of storage capacity. There are significant regional differences in the adoption of battery storage systems across the country.

Is Italy a good place to invest in energy storage?

Italy is an incredibly interesting and fast-growing market for renewables and there's significant untapped potential in the energy storage sector. "Big batteries like the ones we're developing with this new joint venture make the most of when it's sunny and windy by storing abundant green energy and releasing it back into the grid when it's needed.

Germany, the U.K., and Italy emerged as the leading markets for battery storage installations in Europe during 2023. According to TrendForce statistics, Germany, the U.K., and Italy added capacities of 6.1GWh, 4.0GWh, ...

This is the second deep dive in our four-part series that explores why battery-based energy storage is key to

addressing Southern Europe's grid flexibility challenges. This article delves into the intricacies of the Italian energy market and how the current high reliance on gas-fired power generation puts the country's decarbonization targets at risk and impacts ...

"Enel was awarded 10.4 GW of existing capacity, 1 GW of foreign capacity, and 1.5 GW of new capacity, over two thirds of which will be met by battery energy storage systems (BESS) and the ...

Octopus Energy charges up Italy's battery storage sector with new joint venture Joint venture launched with Nexta Capital to develop up to 1.5 GW of battery storage in Italy, making the most of when it's sunny and windy

Three projects in Italy's Lombardia, Piemonte, and Puglia regions. 14 February 2024, ITALY / UK / SINGAPORE - ACL Energy, a Milan-based battery energy storage developer, today announces a joint venture ...

Utility and IPP Enel has sold a 49% stake in its subsidiary that will own and operate 1.7GW of battery energy storage system (BESS) projects in Italy, to investor Sosteneo. Sosteneo will take a 49% stake in Enel Libra Flexsys with parent company Enel Italia S.p.A holding the remaining 51%, retaining control over the company.

London-based renewables company Renewable Power Capital (RPC) and Italian renewables developer Altea Green Power have entered a development partnership for 1GW of battery energy storage in Italy. The partnership aims to achieve ready-to-build status for the battery storage pipeline over the next two to four years.

The newly formed JV aims to develop over 1 GW of Battery Energy Storage System ("BESS") projects, establishing Cubico's presence in Italy's rapidly growing battery storage market. The JV will encompass four projects in its initial phase, incorporating two contributions from Cubico with a combined capacity exceeding 150 MW.

Enel Green Power will start building 1.6GW of battery storage projects in Italy this quarter, with the country's utility-scale market expected to soar in the next three years. The renewables arm of multinational energy firm ...

From January to the end of October 2024, Italy added 1.74 GW of storage system projects. Romania opens EUR150 million pot for co-located battery storage . The Romanian Ministry of Energy has ...

See all Energy-Storage.news coverage of the market in Italy here. Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 21-22 February 2024. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service ...

Italian startup Energy Dome has now begun to commercialize the world's first CO₂ Battery, which was launched earlier this month in Sardinia, Italy. The battery uses carbon dioxide to store ...

Located in Avetrana in the Province of Taranto, Italy, Torre di Pierri is a 9.3 MWh standalone system that supports grid stability and arbitrage. Trina Storage was contracted by Trinasolar ISBU for the provision of the battery energy storage system, representing the first time the former has delivered a utility-scale energy storage project in ...

Last week, UK battery storage developer Field announced it would enter Italy, while Innovo Group and Aquila Capital made similar moves last year. The residential energy storage market in Italy is already very strong, with the second-highest (321MWh) deployments in 2022 after Germany according to figures from trade body SolarPower Europe. This ...

Comes as Octopus scales its activity in Italy targeting EUR1bn investment by 2030; London, 14th December 2023 - Octopus Energy's generation arm announces the launch of a new joint venture (JV) with Nexta Capital ...

Battery energy storage system (BESS) capacity in Italy reached 587MW/1,227MWh in the first three months of 2022, of which 977MWh is distributed energy storage, according to the national renewables association, ANIE Rinnovabili. Like Germany, Italy's BESS market is currently dominated by the residential and commercial & industrial segments.
