When will New Jersey's first offshore wind power come online?

New Jersey's first offshore wind power is expected to come online as early as 2024. The average wind farm off of New Jersey's shore is expected to create 4,300 jobs and add \$702 million to the state's economy.

Can offshore wind power New Jersey?

That means embracing offshore wind energy, which doesn't pollute the air like coal, gas, oil, and other fossil fuels. Offshore wind holds the key to powering New Jersey's future and ensuring communities, the environment and future generations can thrive. We face a high cost of doing nothing if we don't intervene with solutions like offshore wind.

Will New Jersey become the east coast leader in offshore wind?

New Jersey has set a goal of getting 100% of its energy from clean sources by 2035, and it wants to become the East Coast leader in offshore wind. "The strong wind resources off New Jersey's shoreline are well-suited to the development of a robust offshore wind program," said Kira Lawrence, a senior policy advisor with the board.

Will New Jersey's New offshore wind projects Power 1.8 million homes?

TRENTON -- New Jersey officials approved two new offshore wind projects off the Jersey Shore on Wednesday, projects they expect will power 1.8 million homes across the state.

Will Atlantic shores offshore wind build a new offshore wind project?

Despite the uncertainty in the offshore wind industry, Atlantic Shores Offshore Wind remains on target to build a 1,510-megawatt project off Atlantic City for New Jersey. The company anticipates the project will be operating sometime in 2027.

Why is offshore wind important in New Jersey?

Offshore wind holds the key to powering New Jersey's future and ensuring communities, the environment and future generations can thrive. We face a high cost of doing nothing if we don't intervene with solutions like offshore wind. Without it, there will be no Jersey Shore.
