

Jinko 540w photovoltaic panel parameters

Does Jinko Solar withstand wind and snow?

Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). 0.55% annual power degradation and 25 year linear power warranty. ©2020 Jinko Solar Co.,Ltd. All rights reserved. Specifications included in this datasheet are subject to change without notice.

Why should you choose Jinko Solar?

High salt mist and ammonia resistance. Optimized electrical design and lower operating current for reduced hot spot loss and better temperature coefficient. Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). 0.55% annual power degradation and 25 year linear power warranty. ©2020 Jinko Solar Co., Ltd. All rights reserved.

Where should Jinko PV modules be installed?

Jinko PV modules should be installed in suitable locations. Do not install the modules in places that could be flooded. Be careful when installing the photovoltaic modules particularly at the corners of the racks or trackers.

Can Jinko Solar be copied?

This document shall not be copied, duplicated, transferred, redistributed, published, used in presentations - whether public or private - or in any social media platform, neither in whole nor in part, in any form or by any means without the prior written consent of Jinko Solar.lar.eu

Why should you choose JinkoSolar n-type modules?

N-type modules with JinkoSolar's HOT 2.0 technology offer better reliability and efficiency. High salt mist and ammonia resistance. Better light trapping and current collection to improve module power output and reliability.

What should I do if I have a problem installing Jinko?

In case of any doubt please contact Jinko technical service. Operation, maintenance, and cleaning procedures shall align with international standards and recommended actions described in this manual. Always perform installation according to the JKS installation manual. Do not cut the plugs off, otherwise you risk losing the warranty.
