

Jinko 550w photovoltaic panel voltage

Where should Jinko Solar PV modules be installed?

In most applications, Jinko solar PV modules should be installed in a location where they can receive maximum sunlight throughout the year. In the Northern Hemisphere, the module should typically face south, and in the Southern Hemisphere, the modules should typically face north.

Does Jinko Solar withstand wind and snow?

Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). 0.55% annual power degradation and 25 year linear power warranty. ©2020 Jinko Solar Co., Ltd. All rights reserved. Specifications included in this datasheet are subject to change without notice.

Why should you choose Jinko Solar?

High salt mist and ammonia resistance. Optimized electrical design and lower operating current for reduced hot spot loss and better temperature coefficient. Certified to withstand: wind load (2400 Pascal) and snow load (5400 Pascal). 0.55% annual power degradation and 25 year linear power warranty. ©2020 Jinko Solar Co., Ltd. All rights reserved.

What should I know before installing Jinko Solar?

as may be present. Do not remove any part installed by Jinko Solar or dislodge the module. All instructions should be read and understood before attempting to install, wire, operate and maintain the module. Don't lift up PV modules using the attached cables or the junction box. Do not touch live terminals.

What pressure does a Jinko module meet?

Weather stickers match. Jinko modules are designed to meet a maximum positive (or downward) pressure of 3600Pa (Only refer to the mentioned module type in this manual) and negative (or upward) pressure of 1600Pa. This design load was then tested with a safety factor of 1.5.

What is the length of a Jinko module?

Refer to Figure 11. For Jinko standard full module, L is 900/1200mm, the half-cut module L is 145/290mm, and the SWAN bifacial module L is 150/250mm. For customized module, L can be based on your condition. Please take the cable length into consideration before designing.

The Jinko 550W Tiger Mono Facial solar panel is a 550W monocrystalline module with 144 cells from Jinko Solar, one of the world's leading manufacturers of the photovoltaic industry. Jinko ...

550W Jinko Tiger PRO Half Cut Solar Panel 550W 600W 800W Solar Panel 10bb 144 Cells Mono Perc Factory Price in Stock, Find Details and Price about Solar Panel Monocrystalline Panel ...

Jinko: 550W Solar Panel Mono Crystalline Half Cell (JKM550M-72HL4-V) R 1,485.00 Excl. VAT. Note: All prices are subject to change without notice.

Jinko 550w photovoltaic panel voltage

of our prices are excluding VAT. ... 550W o Maximum Power Voltage(Vmp): 40.90VDC o Maximum Power Current(Imp): ...

The Jinko 550w solar panel has an optimized temperature coefficient capability, making it able to generate 2% more power than other panels under high temperatures. The Tiger Neo and pro solar panels series by Jinko feature top ...
