

Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.

Should Kosovo invest in energy transition beyond coal?

We find that Kosovo can seize on the readiness of international financial institutions and development banks to invest in the country's energy transition beyond coal. Kosovo can use these funds to develop a world-class, energy-efficient, renewables-based economy.

What is the energy strategy in Kosovo?

The main policymaking document in the energy sector in Kosovo is the Energy Strategy (hereafter: the Strategy). The Strategy is drafted by the Ministry of Economy, covers a period of ten years and has to identify the main challenges that the sector faces and outline the policies to develop the sector.

How secure is electricity supply in Kosovo?

Security of electricity supply depends on a fleet of aged coal-fired power plants built between the 1960s and 1980s owned and operated by the Kosovo Energy Corporation, one of the biggest public enterprises in the country. The uptake of renewables has been slow with a limited number of support measures in the last decade.

What is the energy mix in Kosovo?

The other generation capacities in Kosovo come from hydropower plants while renewables are less represented in the energy mix although their representation has been rising in the last decade. Currently, Kosovo has 137 MW installed wind capacity and 10 MW installed solar capacities.

How much does gas-fired energy cost in Kosovo?

According to the IEA, gas-fired generation has a levelised cost of energy (LCOE) of \$90/MWh (~EUR76/MWh), but this does not include the large cost of new infrastructure that would be required to secure gas supply into Kosovo.

Now, let's break down some of the factors that contributed to the energy crisis in Kosovo one by one. The Annual Balance of Electricity and Thermal Energy for 2021 -- a document published by ERO that plans the ...

It also includes non-energy uses of energy products, such as fossil fuels used to make chemicals. Some of the energy found in primary sources is lost when converting them to useable final products, especially electricity. As a result, the breakdown of final consumption can look very different from that of the primary energy supply (TES).

Energy Skills for the Future Activity w Final Detailed Design Report 1 1. INTRODUCTION The Energy Skills for the Future (ESF) Activity, part of the Just and Equitable Transition Acceleration (JETA) Project, seeks to align labor market demands with education and training in Kosovo's energy and adjacent sectors.

Kosovo: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
