

Latest ranking of photovoltaic panels by the Ministry of Industry and Information Technology

How big is China's photovoltaic industry in 2022?

BEIJING, Feb. 18 -- China's photovoltaic (PV) sector posted robust growth in 2022 with the total output value of the industry exceeding 1.4 trillion yuan (203.9 billion U.S. dollars), official data showed.

How did China's photovoltaic industry perform in the first half of 2024?

China's MIIT has reported substantial growth in the country's photovoltaic (PV) industry for the first half of 2024. Production in key segments - polysilicon, wafers, cells, and modules - rose by more than 30% year on year. Polysilicon output jumped 74.9% to 1.06 million tons, while wafer production increased 58.6% to 402 GW, with 38.3 GW exported.

Is China's PV industry growing in 2024?

China's Ministry of Industry and Information Technology (MIIT) says the country's PV industry recorded significant production increases in the first half of 2024, while Trina Solar has announced a new research collaboration with Singapore's Institute of Materials Research and Engineering (IMRE).

How many solar panels are produced in China?

The nation's solar manufacturers produced at least 40GW of wafers - of which only 5.1GW were shipped for export; 39.5GW of cells, and at least 21.9GW of solar panels, according to the ministry. Chinese inverter makers produced around 27GW of products in January and February, the government department reported.
