

Lesotho solar for food truck

How does Thabane's solar-charging system benefit rural communities in Lesotho?

Apart from Thabane's solar-charging booths, rural communities benefit from the off-grid electricity supplied by One Power, a Lesotho-based energy start-up. The company's solar mini-grid system started operating at Ha Makebe in Berea district in March 2021, according to the Lesotho Bureau of Statistics' 2021 Energy Report.

Could solar power Help Lesotho's farmers?

As organisations like One Power and booth-builders such as Thabane look to boost electricity access across the country, solar power may yet become an increasingly important tool for Lesotho's farmers, and an ever more empowering energy source for its rural communities.

Where is Lesotho implementing its first solar power plant?

The company's solar mini-grid system started operating at Ha Makebe in Berea district in March 2021, according to the Lesotho Bureau of Statistics' 2021 Energy Report. At the larger scale, the Lesotho government is implementing its first solar electricity plant at Ramarothole in Mafeteng district, which is expected to generate 70 MW once completed.

How did Frazer solar Help Lesotho?

Imported electricity comprised 41% of volume and 86% of cost. This put enormous pressure onto the Government of Lesotho and the state owned Lesotho Electricity Company (LEC). Frazer Solar developed a multifaceted project that would dramatically improve the situation by reducing electricity imports.

Does Lesotho rely on imported electricity?

The southern African nation of Lesotho is heavily reliant on imported electricity from neighbouring countries. Imported electricity comprised 41% of volume and 86% of cost. This put enormous pressure onto the Government of Lesotho and the state owned Lesotho Electricity Company (LEC).

How can Lesotho improve access to electricity?

While Lesotho is trying to increase access by connecting rural households to the national grid through a rural electrification programme first introduced in 2004, researchers argue that the high costs of electricity connections and tariff rates make it almost impossible for rural people to actually use the commodity.
