

Liberia solargaps price

What is a solargaps system?

The SolarGaps system consists of solar panels connected by a durable steel cable or by rigid guides to ensure secure attachment, even when the wind is strong. These facade blinds fully retract for a clean appearance and are protected by a headbox.

What are solargaps smart blinds?

SolarGaps smart blinds are the first blinds that automatically track the sun and generate electricity from its energy while keeping your apartment or office cool.

Are solargaps blinds a good investment?

With the ability to generate enough power to run 30 LED light bulbs, SolarGaps blinds are the perfect combination of IoT smart home device and intuitive renewable energy source. This is a no-brainer purchase for anyone interested in jumping on the road to energy independence without forking over the dough for solar panels.

How much energy does solargaps generate?

1 m² of SolarGaps blinds generates around 100 watts per hour on a sunny day, which is enough to charge a smartphone or laptop, or to power a TV. Sunpower solar cells and SolarGaps' auto tracking mode ensure that the maximum amount of energy is generated at all times.

How does solargaps work?

SolarGaps is an all-in-one solution. Simply plug it in and the solar energy will charge your devices connected to the electrical grid, thus, reducing power usage from external electricity providers. If you have an emergency battery storage, you can also connect it to the SolarGaps system and use the solar-powered energy whenever you need it.

Does solargaps work with Google Home?

SolarGaps integrates with a smartphone app, Google Home, Amazon Echo and the Nest Thermostat. It can either feed electricity back into the grid or into a battery system like the Tesla Powerwall. On top of all that, the campaign claims the product can be custom-made for the same cost as (non-solar) motorized blinds.

SolarGaps es una persiana inteligente con placas fotovoltaicas incorporadas capaces de seguir automáticamente al sol, produciendo energía limpia y renovable y al mismo tiempo manteniendo fresco el lugar donde está instalada.
