

Are solar PV systems a good investment in Libya?

In Libya, the solar photovoltaic (PV) systems are encouraging for the future, due to incident solar radiation is greater than the minimum required rate across the country (Hewedy et al., 2017). Based on that from a techno-economics point-view, there is a need to develop substantial energy resource solutions.

Can solar energy be used to generate electricity in Libya?

(Kassem et al., 2020) performed a study analysis of the potential and viability of generating electricity from a 10 MW solar plant grid-connected in Libya. The consequences of that study indicate that Libya has a massive potential of solar energy can be utilised to generate electricity.

Is Libya a good country for solar energy?

Libya is blessed with long sunny hours and is exposed to the sun's rays throughout the year (Al-Refai, 2016). Moreover, the country is rich with abundant and reliable solar energy resources with an estimated average of sunshine of over 300 days per year (Alnoosani et al., 2019). 5. Application of solar PV in Libya

Can street lighting be used for electricity generation in Libya?

The feasibility of moving from a conventional power generation system (fossil fuel) to clean, renewable energy for electricity generation in Libya. The contribution of street lighting load represents about 19% of the electricity demand in Libya (Asheibi et al., 2016).

What are the main energy sources in Libya?

Libya relies fully on fossil fuels to generate its electricity; hence, the Natural Gas and Oil are the key energy sources (Sorensen, 2010). The power stations in Libya are dependent on light and heavy oil, with a growing dependency on natural gas (Asheibe and Khalil, 2013).

Is PV a viable alternative to fossil fuels in Libya?

Besides to energy demand in Libya has also been noticed to be rising, and PV may be the alternative to meet some of this demand without needing to construct new fossil fuel power plant stations due to the increased insolation availability of approximately 8.1 kWh/m²/day (Chedid and Chaaban, 2003).
