Access to affordable, reliable, sustainable and modern electricity and cooking technologies remains limited in Burundi. Only around 10% of Burundians have access to electricity, and in rural areas energy use is dominated by wood-fuels and traditional stone hearths for cooking. Our new report assesses the market opportunity for off-grid solar and improved ...

Every six months, Lighting Global and GOGLA publish the Global Off-Grid Solar Market Report, a market intelligence series on sales and impact of off-grid solar lighting products, sold by GOGLA and Lighting Global affiliates. Since H2 2018, the report also includes sales numbers of off-grid appliances, in partnership with the Efficiency for Access Coalition.

The Lighting Global team has updated the Quality Standards to encourage the production of higher quality and safer products to better protect consumers. These updates include improvements to the lumen maintenance criteria, inclusion of a battery durability test, a ban on batteries containing cadmium or mercury, a requirement that all PV modules be ...

IFC winds down Lighting Global Support to focus on mobilizing investment for Off-Grid Solar sector, World Bank expands program with ESMAP A Letter from Russell Sturm & Dana Rysankova Colleagues, For more than a decade, the World Bank Group"s Lighting Global program has been at the forefront of the drive to expand access to modern

Current Energy Landscape Despite Somalia"s history of protracted conflict, its private sector has shown entrepreneurship and resilience, and succeeded in maintaining economic activity in a challenging environment. In the absence of an electric grid, privately owned and operated diesel-powered mini-grids were developed, which provide nearly all of Somalia"s electricity. However, ...

VeraSol was launched by Lighting Global, CLASP, and the Schatz Energy Research Center in February 2020 and is the leading independent quality assurance program for distributed solar solutions, appliances and equipment. The program represents an evolution and continuation of more than a decade of off-grid solar sector quality assurance activities carried out through ...

Nearly 60 million households (approximately 300 million people) in India are un-electrified (Ministry of Power, Government of India, June 2016). The majority of this large under-served population relies on

kerosene for lighting, which is unhealthy, polluting and expensive. This lack of modern energy services also severely limits educational and economic opportunities, as well ...

This brochure provides a brief overview of the Lighting Africa program, including its approach and history. It replaces a previous version of the brochure published in 2015 to reflect new program-countries and updated results.

The 2018 Global Off-Grid Solar Market Trends Report is the fourth report in a biennial series established over the past 8 years as the report of record for the off-grid solar industry. The flagship Market Trends Report provides an opportunity to step back for reflection on long-term trends, challenges and opportunities--illuminating a path forward for the

The developers of the Little Sun lamp have partnered with Plan International to pilot the use of their solar-powered LED lamps through sustainable, community-led initiatives in Zimbabwe. The lamp provides people without electricity clean, affordable lighting allowing them to work, socialise, study, cook, and extend their daily activities into the night without the need for ...

Since we kicked-off our first pilot program in Kenya in 2009, the Lighting Global program has been at the forefront of the drive to expand access to modern solar energy services to people living without access to electricity around the globe.

After a successful pilot phase that enabled more than 28.5 million people across Africa to switch from polluting energy sources such as kerosene to clean, sustainable solar lighting, the joint IFC-World Bank Lighting Africa program has expanded to 10 more countries.. Piloted in Kenya and Ghana, Lighting Africa is now operational in Burkina Faso, the ...
