

Malaysia maclean energy

What is Malaysia's Energy Outlook?

The outlook provides a comprehensive, renewables-focused, long-term energy pathway for the transition to a cleaner and more sustainable energy system in Malaysia.

Should Malaysia explore energy transition in the power generation sector?

Total primary energy supply (EJ). Source: IRENA [9,10]. Given the complex circumstances and interrelationships, Malaysia should seriously explore energy transition in the power generation sector by expanding RE to reduce emissions from fossil-based power plants.

How can Malaysia transform its energy system?

Utilise the long-term opportunities of the energy transition - through the development of cohesive and integrated long-term energy planning strategies. Malaysia has taken important steps to transform its energy system to a more secure, clean and affordable one in the future.

Who are Malaysia's Energy Regulators?

These included the energy regulator (Energy Commission), state utilities (Tenaga Nasional Berhad, Sarawak Energy Berhad, and Sabah Electricity Sdn Bhd), the Ministry of Transport (MOT), and other stakeholders (Single Buyer, Grid System Operator, and Malaysian Green Technology And Climate Change Corporation).

How much energy does Malaysia use?

Malaysia's total final energy consumption nearly doubles by 2050 in the PES, dominated by fossil fuels, whereas a transition in the 1.5-S reduces that demand by 23%. As of 2018, Malaysia's primary energy supply was around 4.1 EJ, with the share of renewables at only 3%.

What percentage of Malaysia's energy supply is renewable?

As of 2024, IRENA notes renewables account for just 5% of Malaysia's energy mix. Hydropower and solar make up the majority. However, according to government data, as of the end of 2020, renewable energy sources accounted for 23% of national power. Total Energy Supply (TES) by Source, Malaysia 1990-2020, Source: IEA
