What is Eneco Energy Trade?

Eneco Energy Trade is the only integrated energy trading platform in the Netherlands. This sets us apart from all other Dutch energy companies that have their trading floors abroad. For new providers and project developers, we are an important and accessible gateway to the energy market.

Who is Eneco?

Started in 2000 as a trading unit within Eneco, we have grown into the connecting link for climate-ambitious parties in the European energy chain. This goes beyond the daily buying and selling of (our own) renewable energy.

How does Eneco Energy Trade manage risk?

The energy market is a dynamic environment with price fluctuations, interest rate changes, geopolitical uncertainties, and technological advancements. Our risk managers assess these market risks 24/7 and establish the frameworks within which Eneco Energy Trade can operate, thereby protecting both our customers and ourselves from financial losses.

What is Eneco's trading desk?

Our Trading Desk is Eneco's gateway to the outside world. Here, we bring renewable energy products and derivatives from our own assets and those of our partners to the market, connecting each demand in real time with the right supply.

How does Eneco support sustainable innovation?

Additionally, we support our own business units within Eneco to continue investing in green innovation and new propositions. Sustainable innovation is more than developing new technologies to generate, distribute, and store renewable energy.

Known for being thorough and perseverant, I am a creative and practical problem solver. My passion for sustainability drives me to pursue new challenges, such as doing a master's abroad and embracing other cultures. Recent experiences have led me to develop excellent adaptive communication skills to reach stakeholders. Eager to use my skills and proclivities to maximize ...

If Eneco Energy Trade is the heart of Eneco, Portfolio Management is the team where all of our flows converge. It's where analysts and portfolio managers use mathematical models to predict opportunities and risks in Eneco's gas, electricity, and certificate portfolio. For example, do the maths for offshore wind farm development projects.
