

What is the global microgrid market size?

The global microgrid market size was valued at USD 9.88 billion in 2023 and is projected to grow from USD 11.24 billion in 2024 to USD 37.35 billion by 2032, exhibiting a CAGR of 16.19% during the forecast period. Asia-Pacific dominated the microgrid market with a market share of 43.02 % in 2023.

How big is the microgrid market in 2024 & 2032?

The market is further expected to grow at a CAGR of nearly 10.4% in the forecast period of 2024 and 2032 to reach a value of approximately USD 70.74 billion by 2032. The dominant region for the microgrid market is North America, accounting for a quarter of the market share.

What are the growth opportunities in the microgrid market?

The microgrid market provides numerous growth opportunities to market players such as ABB, General Electric, Siemens, Eaton Corporation, and Honeywell. These companies are engaged in the process of product innovation, collaboration, and acquisition to expand their services across various regions.

What is the microgrid Market Outlook forecast?

The microgrid market outlook forecast is quantitatively analyzed from 2020 to 2030 to benchmark the financial competency. Porter's five forces analysis illustrates potency of buyers and the microgrid market forecast of key vendors. The report includes the industry trends and the microgrid market share of key vendors. Analyst Review

Where is the microgrid market located?

The dominant region for the microgrid market is North America, accounting for a quarter of the market share. Development in the region is triggered by the growing use of microgrid in defence as well as remote systems to improve cyber-attack protection.

How will the microgrid industry perform in the coming years?

In the coming years, the microgrid industry is expected to generate moderate cash output with modest investments in development, research, and tests. However, the microgrid market is nearing the maturing stage, and is expected to generate modest revenue for key players in the coming years.

Emerging data from Ember, a leading energy think tank, indicates that solar capacity additions for 2024 are significantly surpassing initial forecasts. Early in the year, the International Energy Agency (IEA) and other ...

In 2016, India's ministry of New and Renewable Energy (MNRE) launched a plan to install 10,00 microgrids and minigrids, aiming at a cumulative capacity of 500MW by 2021. The ministry defines microgrids as renewable ...

Microgrid industry capacity

Microgrid Market Research, 2030. The Global Microgrid Market size was valued at \$15.88 billion in 2020, and is projected to reach \$59.74 billion by 2030, registering a CAGR of 14.9% from ...

The Global Microgrid Market size was valued at \$15.88 billion in 2020, and is projected to reach \$59.74 billion by 2030, registering a CAGR of 14.9% from 2021 to 2030. A microgrid is a self-reliant, localized energy system that serves a ...

The Global Microgrid Market Size was valued at USD 53.9 billion in 2022. The Market is growing at a CAGR of 16.3% from 2022 to 2032. The worldwide Microgrid Market size is expected to reach USD 245.5 billion by 2032. Asia ...

The global microgrid market size reached approximately USD 28.98 billion in 2023. The market is projected to grow at a CAGR of 10.4% between 2024 and 2032, reaching a value of around USD 70.74 billion by 2032.

The Microgrid Market size is estimated at USD 15.92 billion in 2024, and is expected to reach USD 38.12 billion by 2029, growing at a CAGR of 19.08% during the forecast period (2024-2029). In 2020, the market was negatively ...

Based on the table above, the installed capacity of wind turbines and PV systems in each microgrid is as follows: Microgrid C, located in an area with abundant wind resources, ...
