

microsonic - innovation in ultrasonic technology. Founded in 1990, microsonic - located in Dortmund, Germany - is an internationally renowned and valued specialist in the field of ultrasonic sensors. Their products borrow from the scientific principles of ultrasound found in nature, because humans and animals have always used sound as an information medium and as a means of ...

Comfort Zone Microsonic Facial Device is developed and produced in Italy with the ambition of taking the professional salon treatment to your home! The device can be used in three different ways. It is recommended to proceed all three steps in order to get the best results.

The energy devices for generation, conversion, and storage of electricity are widely used across diverse aspects of human life and various industry. Three-dimensional (3D) printing has emerged as ...

Zimbabwean Inventor, Maxwell Chikumbutso has built a TV set that works without electricity. He also made a hybrid engine powered helicopter, an electric car, a magnetic converter, a green power generator and a drone.

The LinkControl Adapter allows the comfortable setting of numerous microsonic sensor families. | LCA-2. Distance sensors . cylindrical. mic+. mic+ ultrasonic sensors mic+ sensors are available in four unit variants with five different detection ranges. ... These completely metal mic sensors are available in two device designs with five different ...

Zimbabwean inventor who is based in the United States Sangulani Maxwell Chikumbutso has invented a greener power machine that generates 50 kilowatts and can power 10 homes sharing 5 kilowatts each. The generator creates electricity without using any kind of fuel something that is believed to be physically impossible by physics. In a Facebook post the ...

Definitions. This invention is directed to transducer devices for focusing energy of sonic, audible and ultrasonic waves in either transmitting devices such as loudspeakers and ultrasonic transmitters and receiving devices such as microphones and ultrasonic receivers. More particularly, the present invention is directed to transducers designed to maximize a sound ...

Different operating modes and device configurations enable microsonic sensors to be used in all conceivable automation applications. A sensor's blind zone . determines its smallest permissible detection range. No objects or disturbing reflectors should be placed in the blind zone because this can lead to incorrect measurements. The detection range

This combination device enables the system to deliver microsonic energy and drugs simultaneously to accelerate clot dissolution. Reduction in time translates to fewer drugs, lowering the risk profile of the procedure while the convergence of technologies results in a safer, faster, more complete outcome in the treatment of deep vein thrombosis ...

He hasn't even attempted to show any proof that his "micro-sonic energy device" (i have no idea why he calls it that since it apparently generates energy from RF radiation) can generate enough power to run a calculator, talk less an LED TV.

Chikumbutso explained that his generator is a "Microsonic Energy Device". It generates half a megawatt which can power about 300 homes. Chikumbutso said the generator is powered by " the natural energy that God ...
