

Who is responsible for the energy security activity in Moldova?

The four-year Moldova Energy Security Activity is implemented by Tetra Tech ES, Inc., with local and international subconsultants.

How can Moldova's energy system be integrated with Europe?

Improve physical and market integration of Moldova's energy system with Europe. Connecting Moldova's electricity system to the European grid is an important first step that will help create an open electricity market with neighboring countries and support fair and competitive procurement of cleaner energy.

How much energy does Moldova use?

Moldova imports 100% of its gas and coal consumption, nearly all of its oil consumption and around 80% of its electricity (including electricity procured from the Moldavskaya GRES [power station] situated in Transnistria). 1 Second, Moldova has obligations stemming from its aspirations for European integration.

What is Moldova's energy self-sufficiency?

Moldova's energy self-sufficiency is among the lowest in the world: only around 25% of its energy demand is covered by domestic production, consisting almost entirely of solid biomass and variable renewable energy sources.

What are the sources of electricity and gas imports in Moldova?

The sources of electricity and gas imports are not diversified and crucially depend on gas supply from Russia and electricity supply from the Moldavskaya GRES power station, which operates beyond the control of the Moldovan government.

Will the EU help Moldova deal with its energy crisis?

During a visit by the President of the European Commission Ursula von der Leyen to Moldova, a 250 million-euro financial package from the European Union (EU) was announced to help Moldova deal with its energy crisis. (Passage remains the same)
