Will Mozambique harness its natural gas resources?

Speaking on the third day of the COP28 UN climate conference, President Nyusi said Mozambique will still harness the potential of its offshore natural gas reserves in a diverse energy mix that will also exploit its abundant hydroelectric, wind and solar resources.

How can Mozambique contribute to a green energy transition?

Studies have indicated that this could a 60% reduction in the country's aluminium exports and a 2.5% decrease in the country's GDP. On the other hand, Mozambique also has unrivalled natural energy resources that could significantly contribute to a green energy transition, not only domestically but also in the Southern African region.

How much will Mozambique's energy transition strategy cost?

To fully realise this ambitious potential of the energy transition strategy, the opportunities for short-term investments to be financed amount to \$3 billion next year alone," said Mozambique's Minister of Mineral Resources and Energy, Carlos Zacarias.

Should Mozambique use hydroelectric power and natural gas?

"African countries, and in this case Mozambique, should use an energy mix of hydroelectric power and natural gas," Dr Adesina said during the panel discussion. "To those who say that natural gas creates a lot of problems, I reply that it doesn't, really. How can we justify having 600 million people without electricity?"
