Q: How do solar lights cut carbon emissions? Right now, there are around 800 million people in the world who do not have reliable access to modern electricity. They have no alternative to fossil fuel-based lighting like kerosene lamps and candles to light their homes. Not only do these outdated lamps pollute the atmosphere with CO 2 and contribute to global heating, they are ...

Planning approval has been granted for the solar farm to be built in Norfolk, East England that will produce 55 GWh of electricity annually to power over 14,000 homes and businesses and includes 15 MWh of battery storage.. 26.01.2022 - London: Namene have partnered with STEAG Solar Energy Solutions GmbH (SENS) to develop the 49.9 MWp Estuary Solar Farm in Norfolk.

Then Namene's solar lights transformed their lives, in more ways than one. The many costs of energy poverty In rural Zambia, around 85% of the population have no access to electricity For households in those remote communities, the only options are expensive and poor-quality sources of light like kerosene lamps and candles.

A year of Zafi: how Namene solar products have changed lives in Zambia. Discover how Namene products

# Namene solar Cook Islands

are changing lives and benefitting communities. We spoke to the first Zafi solar charger customer in Zambia, about his experience with our solar lights and charger. [Read More](#)

Zambia was Namene's first carbon project, which has since seen almost a quarter of a million solar lights delivered across all ten provinces since 2021. This rapid growth was underpinned by our trailblazing strategy to make solar lights affordable and accessible to all. Understanding the carbon value of a solar light

In addition to the roving distribution team, Namene has also opened five Namene branded stores in commercial retail spaces across all five of Namibia's regions, which sell and service Namene lights and products for rural customers. In Namibia, 54% of the population have no electricity access. In rural areas, this figure is even higher, at 65%.

Unlocking the power of solar lights. We empower communities through our climate projects with the power of clean technology. Under our inaugural 2 Million Lights programme we have deployed over one million solar lights in Zambia, Zimbabwe and Namibia since November 2021. This has saved more than 650,000 families over \$6 a month. Namene's 2 Million Lights programme is ...

For children, this means they often find themselves in the dark when it comes time to do their school work." He continued, "Namene solar's lights are an innovative and effective solution to overcome this, lighting up the children's books and minds." At Namene Solar, our purpose is to bring clean light and power wherever it is needed.

All devices distributed by Namene are designed to help people and families thrive, wherever they live, by meeting their daily utility needs while eliminating sources of combustion - starting with eradicating harmful kerosene ...

Renewable energy in the Cook Islands is primarily provided by solar energy and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce ...

By investing in Namene's carbon projects you'll directly impact families living without energy access by replacing dangerous, toxic kerosene lamps with safe, sustainable solar lights. Not only does your purchase avoid carbon emissions, ...
