

Namibia whole home backup generator

Why do Namibians need generators?

The ongoing instability of the power supply throughout countries like Namibia have caused people in these regions to seek more reliable sources of electricity to power their homes and businesses when the lights go off. Generators offer a stable power source, without the high initial investment of solar or wind power.

What types of generators are available in Namibia?

There are a variety of options on the market in Namibia, including diesel generators, petrol generators, three phase generators, single phase generators, and silent generators. In this article, we consider the best generators available to residents of Namibia, each with its own set of applications that are perfect for homes and industry.

Should you buy a whole house or home standby generator?

One of the biggest reasons that most people buy a whole house or home standby generator is to have a backup power source in the event of a power outage or blackout. Generators can help power up all types of electronics, appliances, and tools to ensure you are keeping your family safe and comfortable until power returns.

How does a whole-house generator work?

A whole-house generator, or standby generator, functions by providing automatic backup power to an entire home during power outages. It's integrated into your home's electrical system and usually runs on natural gas or propane. When the generator detects a power disruption, it activates automatically.

How much power do you need for a home backup generator?

You will likely need at minimum a 10,000 Watt or 10kW generator to power a whole house. There are portable generators, that are cheaper than stationary home backup generators, in the 10,000 and 15,000 watt range. But likely, if you want a true home backup generator system, you will want a stationary generator in the 16,000kW and higher range.

Can a whole-house generator save you money?

You might have also had to repair frozen and burst pipes, or an unpowered sump pump might have led to a flooded, moldy basement. Those costs can be avoided if you have a whole-house generator. In fact, savings from a single outage can more than recoup your investment in a home generator.

NEC Power & Pumps caters for various stand-by and emergency power generation applications to all sectors in the economy. We specialized in customized Generator Sets as well as Uninterruptable Power Supply (INVT ...
