

What is the Nauru integrated infrastructure strategic plan?

The Nauru Integrated Infrastructure Strategic Plan was endorsed and adopted by the Nauruan Cabinet on 27 November 2019 as a guide to public infrastructure investment planning and budgeting. The report was prepared by the Ministry of Infrastructure in collaboration with the Ministry of Finance, with the support of the PRIF Coordination Office.

What are the infrastructure assets in Nauru?

While most of the infrastructure assets in Nauru are simple building structures, some assets, such as the wharf (currently under construction), involve engineered structures and complex equipment and require subject matter expertise to develop detailed maintenance plans.

What is Nauru infrastructure asset management framework (niamf)?

The Nauru Infrastructure Asset Management Framework (NIAMF) and the Nauru Integrated Infrastructure Strategic Plan (NIISP) have been developed through a collaborative effort between a team of consultants funded through technical assistance (TA) by the Pacific Region Infrastructure Facility (PRIF) and staff from the Government of Nauru.

Why is Nauru relocating its key infrastructure?

There is more work to be done. Many of Nauru's key assets are vulnerable to coastal related hazards including sea level rise, coastal erosion, storms, water intrusion and flooding which are projected to intensify due to climate change. Therefore, a long-term priority is to relocate key infrastructure to higher ground.

Why is Nauru a good destination for business travellers?

Business travellers are the primary source of visitor receipts in Nauru. The quality of infrastructure, as well as the limited availability of goods and services (including hospitals, activities, hotels, travel agencies, and internet cafes), limit the attraction of Nauru as a destination.

What is the Nauru trust fund?

The government, recognizing this likely outcome, established the Nauru Trust Fund (NTF) with the objective of building up a sufficient principal value that could provide a future stream of budget financing to support investments in education, health, environment, and public infrastructure.

Investment firm Niam Infrastructure and developer Evecon will together deploy a solar-and-storage portfolio in Latvia that could have up to 26MW of BESS capacity. The portfolio will be built in two phases, with construction at the first, including 40MW of solar generation capacity across six sites, already underway, and expected to be ...
