

New Zealand 500 watts solar panel price

How much do solar panels cost in New Zealand?

A 3kW solar power system would need ten 300W solar panels at a rough cost of \$8000 - \$10,000 in New Zealand. Conversely, a 4kW solar power system would require fourteen 290W solar panels at a ballpark figure of \$10k - \$11k installed.

How much does a 5 kW solar system cost in New Zealand?

In 2023, a typical 5 kW solar power system in New Zealand costs around \$13,500. Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which comes down to about \$3.75/W. On the other hand, a larger, 10 kW system can cost around \$25,000, or about \$2.5/W.

What types of solar power systems are installed in New Zealand?

Grid connect systems are the most common type of solar power systems installed in New Zealand. Find out how they work in the video below. We are a New Zealand and operated solar power quote service provider and an unbiased source of information on solar power.

How much does a solar panel cost per watt?

If you like talking and thinking in watts, the average solar power price per watt is now around \$2.50/Wp (watt-peak, the maximum electrical power from a solar panel under standard conditions). This price takes into account the entire cost of the system. Curious about the individual price of a solar panel?

Are solar panels a good investment in New Zealand?

A solar power system in New Zealand can easily earn a 10 to 15% return on investment. But this rate of return is likely to increase each year as the price of electricity continues to climb. Unsure if solar panels on your roof will be worthwhile or if the upfront cost will lead to a good payback?
