

Is Kazakhstan at a crossroads in its energy sector?

Kazakhstan, a vast and resource-rich nation in Central Asia, is at a crossroads in its energy sector. With a growing emphasis on sustainability and a need to align with global decarbonization efforts, the country is embarking on a transformative initiative that aims to ensure the security and reliability of its energy supply.

Will Kazakhstan's Energy Transition be a model for other countries?

Kazakhstan's progress on the energy transition can serve as a model for other countries in the region and beyond on advancing a just transition away from fossil fuels—helping to build a more sustainable, resilient economy for all.

Where does Kazakhstan's electricity come from?

Approximately 70% of Kazakhstan's electricity comes from this carbon-intensive fossil fuel, much of which is mined using outdated Soviet infrastructure. This accident came on the heels of a rather different event involving Kazakhstan's energy industry.

Will Kazakhstan build a wind farm in Zhezkazgan in 2023?

Besides the project in Zhezkazgan, in May 2023 the Ministry of Energy of Kazakhstan signed a quadripartite memorandum with two Chinese companies and one Kazakhstani company on the construction of a wind farm in Zhambyl Region together with factories for the production of nacelles (casings), towers and blades for wind turbines.

Should Kazakhstan adopt an energy security strategy in 2023?

2023 S&P Global. Kazakhstan should articulate and adopt an official Energy Security Strategy document, guided by these general observations (this has to be a flexible document that can be modified to reflect changing circumstances). Kazakhstan's officially reported GHG emissions totaled 340.8 MMt CO₂e in 2021, down 7% from 367.7 MMt CO₂e in 2015.

Is Kazakhstan phasing out inefficient subsidies and modernizing its energy infrastructure?

Kazakhstan's energy sector has long been dependent on fossil fuels, and the country now faces the challenge of phasing out inefficient subsidies and modernizing its energy infrastructure.
