

Norfolk Island green power system srl

Is Island Green Power planning a solar & battery energy storage project?

Island Green Power has unveiled plans for a utility-scale solar and battery energy storage project in Norfolk, England.

Who is Island Green Power?

Island Green Power is a leading developer of renewable energy projects, with a focus on utility-scale solar farms and battery storage systems. Our mission is to help the UK increase our solar energy generation, making more renewable energy possible and drastically reducing carbon emissions. The way we consume energy is already changing.

Does island green power need planning permission for Drove's solar farm?

The planning permission to build and operate the project requires Island Green Power to submit a Development Consent Order (DCO) application. Once submitted, The Drove's Solar Farm DCO application would be examined by the Planning Inspectorate, the independent body responsible for examining NSIPs.

Where is Island Green based?

Island Green already operates solar farms in Salhouse and Trowse in Norfolk, as well as other counties in the East of England.

What is the island green power phase 1 consultation?

The aim of this Phase One consultation is for Island Green Power to introduce themselves, present early-stage proposals, and receive feedback from the community to help identify and understand any local impacts. The Phase One consultation is running between 23 October and 6 December 2024.

When will Island Green Power submit a DCO application?

Island Green Power said it aimed to submit its DCO application to the Planning Inspectorate in late 2025. South Norfolk Council has been approached for comment. Follow Norfolk news on BBC Sounds, Facebook, Instagram and X. The developer says the project would be able to provide energy over the next 60 years.
