

Who is Northvolt AB?

Northvolt AB is a Swedish battery developer and manufacturer, specialising in lithium-ion technology for electric vehicles. Founded in 2015 by two former Tesla executives, it commissioned its first manufacturing plant in Skellefteå, Sweden in 2021 and has announced plans for five others in Europe and North America.

What makes Northvolt a low-carbon battery manufacturer?

A foundation to Northvolt's low-carbon footprint comes from a commitment to power battery manufacturing with 100% fossil-free energy. We're re-writing the playbook on what it means to be a battery manufacturer by adopting a wide spectrum of battery supply chain activities in-house. Going green isn't an optional extra at Northvolt. It's baseline.

What makes Northvolt a good battery manufacturer?

Cell technology. For land, air and sea. A battery cell manufacturer at heart, we're working with three kinds of chemistry -- enabling us to deliver battery solutions for virtually every corner of electrification. A foundation to Northvolt's low-carbon footprint comes from a commitment to power battery manufacturing with 100% fossil-free energy.

Where is Northvolt based?

The group in 2017 announces plans to build \$4 billion lithium-ion battery gigafactory Northvolt Ett and research facility Northvolt Labs. It partners with BMW and truck maker Scania. It says in October 2018 it is developing a battery systems factory in Poland.

Could Northvolt be a big EV battery company headquartered in Europe?

Northvolt has been their best shot at building a big, thriving EV battery business headquartered in Europe. Were the company to fail, ongoing progress in battery technology could make it even harder for another European company to attempt the same feat.

Is Northvolt going out of business?

But things look very different now. The company is fighting for survival and even filed for Chapter 11 bankruptcy in November. The FT's Nordic and Baltic bureau chief Richard Milne spent years reporting on Northvolt and explains its meteoric rise and what its implosion means for Europe's battery industry.

Northvolt was established in 2016 with the simple but ambitious goal to build a sustainable battery industry in Europe. Today, we publish our second Sustainability and Annual Report -- detailing the presence we've established within the industrial landscape and ...

Battery-grade nickel-manganese-cobalt (NMC) blend recovered by Northvolt through the recycling of battery

materials. The Revolt process explained Northvolt's battery recycling process involves several steps, all of which play a role in ensuring the safe and effective processing of materials.

Harald Mix is a Co-Founder of Northvolt and shareholder, Co-Founder and Chairman of Stegra (previously known as H2 Green Steel) and Chairman of Vargas Group. The following article has been translated to English and abridged, following original publication as an OpEd in Dagens Industri, October 15, 2024.
