

Final commissioning is in progress at Rye Park Wind Farm. Tilt Renewables has nine operational wind and solar farms located in Australia plus one wind farm in commissioning and one battery under construction. We are proud to support local communities. Our aim is always to be a positive member of the community.

Revenue is not recognised until all sale contingencies have been resolved. At 31 March 2020, Tilt Renewables operates 266MW (31 March 2019: 440MW) of wind generation assets throughout Australia as well as 196MW (31 March 2019: 196MW) of wind generation assets in New Zealand.

Operating expenses Generation production costs Employee benefits Other operating expenses Generation development An ongoing part of Tilt Renewables business is the development of new generation assets.

Damage to generation assets risk There is potential for Tilt Renewables to sustain significant losses through damage to its generation plant and the resulting loss of earnings. The major portion of this risk has been mitigated by taking out appropriate insurance policies with insurers of high creditworthiness. 74
