I was recently quoted as saying, I don't care if Instagram has more users than Twitter. If you read the article you'll note there's a big "if" before my not giving of said shit. One of the easiest ways to improve travel photos is shooting in better light, and the best light is often in the hour after sunrise and before sunset. The padding on the ear pieces seems adequate for extended usage periods.

Just the other day I happened to wake up early. That is unusual for an engineering student. After a long time I could witness the sunrise. I could feel the sun rays falling on my body. Usual morning is followed by hustle to make it to college on time. This morning was just another morning yet seemed different.
