What is the Philippine Energy Transition Strategy?

The Philippines launched its Philippine Energy Transition Strategies under the Philippine Energy Plan for 2023 to 2050 in November 2023. The energy transition goal is aimed at increasing access to affordable energy, improving reliability and resiliency, and expanding the use of clean and sustainable energy in the country.

Is offshore wind a good investment for the Philippines?

Renewables, such as offshore wind, are expected to play a key role in the transition toward a low-carbon energy mix. With more than 17 thousand kilometres of coastline, the Philippines is estimated to have an offshore wind potential of 178 GW. However, this potential has yet to be leveraged.

How does the Philippines energy auction program Impact Development Goals?

Department of Energy (DOE). Philippines Energy Plan 2018-2040, p. 20. Third, the auction program can contribute to high impact development goals that have been neglected during the COVID period, such as off-grid and island electrification.

How will the government facilitate energy transition in the Philippines?

The government will intensify its effort to facilitate energy transition through policy reinforcement, investment facilitation, technological innovation, and infrastructure development. Click to view/download Philippine Energy Plan 2023-2050

Who drives energy transformation in the Philippines?

The country is driven by the private sector with top energy conglomerates announcing individual decarbonization, sustainability and energy transformation projects. For more information, please contact Thess Sula, Commercial Specialist, U.S. Commercial Service Philippines, at Thess.Sula@trade.gov.

Why are electricity prices so high in the Philippines?

Electricity consumers in the Philippines are subject to the second highest average electricity costs in the Southeast Asia region.³ High prices are largely due to the prevalence of imported fossil fuels in the country's energy mix, making electricity bills dependent on volatile global fuel markets.

Renewable energy is an essential part of the country's low emissions development strategy and is vital to addressing the challenges of climate change, energy security, and access to energy. ...

In November 2022, the Philippines amended its Renewable Energy Law to allow 100% foreign ownership of renewable energy projects. This policy shift came off the heels of a 41% increase in clean energy investment from 2021 to 2022, which contributed to the Philippines being named the fourth most attractive emerging economy for renewable energy ...

Avec cette double acquisition, effective au 1er juillet, Ineo devient leader en génie électrique dans l'Orne et le Calvados et renforce sa position d'expert de proximité. Cette opération permet à Ineo, déjà très présente sur les marchés industriels, de se développer sur le marché du tertiaire.

The United States and the Philippines launched the inaugural U.S.-Philippines Energy Policy Dialogue (EPD) on August 17. The U.S. Department of State's Principal Deputy Assistant Secretary for the Bureau of Energy Resources Laura Lochman and the U.S. Department of Energy's Deputy Assistant Secretary for Asia and the Americas Beth Urbanas co-led the ...

The energy label design features the star rating system for easy reference when comparing the efficiency of similar products. The star rating corresponds to the product's energy efficiency rating, which depends on the CSPF for ACUs, Energy Efficiency Factor (EEF) for refrigerating appliances and television sets, and efficacy for lighting appliances.
