

## Photovoltaic panel roof installation finished product

### What is on-roof solar roofing?

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics.

#### How do roof-integrated solar panels work?

Technically,roof-integrated solar panels function just like traditional solar panels or solar roof tiles,using photovoltaic cells to convert sunlight into electricity. However,instead of sitting on top of the roof on visible brackets that can affect your home's aesthetic appeal,they become a part of the roof structure itself.

### Can a PV system be integrated into a flat roof?

In some cases,PV systems can be integrated directly into flat roofs (Figure 25),although this is not common because the efficiency of PV modules is reduced because the optimum angle relative to the sun is not achieved.

#### Who are the best integrated solar roof manufacturers?

Our top 3 integrated solar roof manufacturers are: Based in the UK, Viridian Solar Panels is famous for its ClearLine Fusion System with a module efficiency of between 16.6% (260W) and 19.2% (300W).

#### What is a solar roof system?

The system is made up of individual panels mounted onto the roofwhich sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

#### Are roof-integrated solar panels a good investment?

Roof-integrated solar panels in the UK are quite the initial investment, yet they can lead to substantial savings in the long run. Based on your property size and the solar panel size, in-roof solar panels in the UK can save you between £440 and £1,005 a year.
