

Photovoltaic panels delivered to the roof

Are integrated solar panels better than on-roof solar panels?

Whereas on-roof solar panels are known to be an eye sore, integrated solar panels are the modern-day solution. As the Solar panels sit in-roof, they appear more streamlined and blend in more seamlessly, making integrated solar panels the more attractive option. Furthermore, In-roof Solar Panels can even be retrofitted to modernise your home.

How do roof-integrated solar panels work?

Technically, roof-integrated solar panels function just like traditional solar panels or solar roof tiles, using photovoltaic cells to convert sunlight into electricity. However, instead of sitting on top of the roof on visible brackets that can affect your home's aesthetic appeal, they become a part of the roof structure itself.

What is a 'in roof' solar panel?

'In roof' solar panels are very similar to 'on roof' panels, the only real differences being that with in roof solar panels, the panels serve a dual purpose, acting both as the roof covering and as generators of electricity. Tiles are not required under an in roof system.

Are solar panels a good choice for a new roof?

In roof solar panels are the obvious choice when building a new property or when roof refurbishment works are being undertaken. The initial choice is whether to use a complete solar roof system or a system in which the solar takes up only a part of the roof.

Are roof-integrated solar panels a good investment?

Roof-integrated solar panels in the UK are quite the initial investment, yet they can lead to substantial savings in the long run. Based on your property size and the solar panel size, in-roof solar panels in the UK can save you between £440 and £1,005 a year.

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

are not intended for single residence dwellings (detached or connected), or to roof-integrated PV panel systems, i.e. those where the PV panels form part of the building envelope. While ...
