Their gratitude was expressed in a note of thanks: Pitcairn Island, Sept. 3, 1831. This is to certify that Captain William Driver of the brig Charles Doggett of Salem carried 65 of the inhabitants of Pitcairn Island from Tahiti back to their native land, during which passage Captain Driver behaved with the greatest kindness and humanity becoming a man and a Christian, and as we can ...

Nestled within the Pitcairn group's four isolated islands, whose surrounding waters were declared an ocean sanctuary in 2016, this initiative is supported by the British government and is a testament to the 40 residents' dedication, as they constructed the marine science base themselves.

Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today

remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population ...

Now things have changed and the most elusive DXCC entity from a Finnish point of view is, in my opinion, Pitcairn Island. Moreover, the Pitcairn island group includes two rare IOTA countries, namely Henderson and Ducie. I earned my licence in 1960 but my first QSO with Pitcairn was established only in 1970 with Tom, then VR6TC, on 20 m

Pitcairn Islands Research Station Personnel: Donald Patrick Albert, Susan Elkins, Matthew Purifoy*, Mason Solomon* Abstract: The Pitcairn Islands Research Station (PIRS) functions as a portal for our studies involving the mutiny on the HMAV Bounty (April 28,1789) and its aftermath. Our affiliate investigators include Donald Albert (Department of Environmental & ...

Discovery of Pitcairn Island . Captain Philip Carteret first spotted Pitcairn Island in 1767 but couldn't land due to rough seas. He miscalculated its location, marking it miles away from its true position. Years later, Captain Cook showed some interest, but it wasn't until the Bounty mutineers arrived in 1790 that the island gained attention.

Pitcairn has always been difficult due to propagation from my part of Europe. Openings on the higher bands were short and unstable. Signals arrived from both short and long paths, but their strength was usually extremely low. Current dx activity on the island is rather limited to digital modes and it is almost impossible to get VP6 on SSB from ...

Pitcairn, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu). This constituted the first stage of a review to locate areas of the Pacific in which investment in the development of geothermal energy resources could be undertaken, findings of the overview study are summarised in Table 1.
