

Who is Alltech Poland?

The Alltech Poland office was established in 2001. Our team works successfully with the leading farms, integrators, premix companies in the country. We provide our customers with a competitive advantage through nutritional technologies tailored to address challenges impacting modern animal production and profitability.

How many photovoltaics are there in Poland?

Recently, a rapid development of solar energy has been observed in Poland and is estimated that the country now has about 700,000 photovoltaics prosumers. In October 2021, the total photovoltaics power in Poland amounted to nearly 5.7 GW. The calculated technical potential of photovoltaics in Poland is 153.484 PJ (42.634 TWh).

What is the potential of solar power in Poland?

For example, the Polish Energy Group--Poland's largest energy company--intends to build systems with a capacity of up to 2.5 GW within a decade. The previously calculated potential of PV was 153.484 PJ (42.634 TWh) and would cover 26.04% of Poland's electricity needs (Table 3).

How much power do PV installations produce in Poland?

At the end of the first quarter of this year, the total power of PV installations exceeded 13 GW, with the share of prosumers being 74%, the share of small installations (50-1000 kW) 21%, and large PV farms 5%. The importance of energy from PV installations in energy production in Poland increased significantly.

How many solar communities are in Poland?

As a result, although Poland's solar capacity has more than doubled in the last three years, only 30 of the EU's 9,000 energy communities are located in Poland.

Does Poland need a photovoltaic strategy?

Poland needs a photovoltaic strategy as the flagship element of the currently updated Polish energy policy and the Polish industrial policy, a strategy understood as a real program to face the challenges. LIST OF CONTENTS - download
