

What is the energy transition in Poland?

Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly. In the latest, seventh edition of the "Energy Transition in Poland" report, Forum Energii presents the state of transition play and a broader look at the overall process.

What is Poland's energy strategy?

It is the first strategic document regarding Polish energy approved in 12 years. It presents solutions to meet EU climate and energy goals such as the construction of offshore wind capacity or the commissioning of the first nuclear power plant in the country planned for 2033.

Why is Poland a good country for energy transition?

Poland has made notable progress on energy transition. It has one of the fastest growing markets for distributed solar PV in Europe, and it has developed a strong programme to drive offshore wind deployment. Poland has also taken important steps to improve energy security, like diversifying energy imports away from Russia.

What is Poland's energy policy?

A central aspect of Poland's energy policy is reducing the reliance on coal, especially for electricity generation and building heating. There is a strong policy focus on energy security and ensuring a just transition that maintains affordable access to energy and protects vulnerable consumers, while promoting economic growth.

What is Poland's energy policy until 2040?

Tell us and we will take a look. The Polish government has approved Poland's energy policy until 2040 (PEP2040), which sets the framework for the energy transformation in the country. It is the first strategic document regarding Polish energy approved in 12 years.

Does Poland have a helmsman for the energy transition?

The energy transition in Poland has no helmsman. There is no single centre to manage the process, so the changes taking place are chaotic. Poland has never offered a comprehensive vision for the decarbonisation of the economy or a plan to reduce dependence on energy resources imported from abroad.
