

By giving a second life to non-recyclable waste that is currently being incinerated or landfilled, GIDARA Energy is contributing to the circular economy by repurposing waste to replace fossil fuels. Below you can see AMA's circular ...

By giving a second life to non-recyclable waste that is currently being incinerated or landfilled, GIDARA Energy is contributing to the circular economy by repurposing waste to replace fossil fuels. Below you can see AMA's circular Economy: Waste is separated in recyclable and non-recyclable waste

GIDARA Energy gaat samen met de TU Delft een Gasification Innovation Centre bouwen in Rotterdam. Het centrum krijgt een vergassingseiland op pilotschaal waar vanaf medio 2023 gezamenlijk onderzoek kan plaatsvinden naar de "derde generatie" HTW-;vergassingstechnologie, waarmee biobrandstoffen kunnen worden geproduceerd uit pure ...

GIDARA Energy is focused on converting waste feedstocks into sustainable fuels and circular chemicals using patented technologies. Our High-Temperature Winkler (HTW ;) gasification technology can be utilized to produce valuable products such as advanced biofuels for use in the road transport, marine and aviation sectors, helping these sectors ...

GIDARA Energy announced a collaboration between its Advanced Methanol Amsterdam (AMA) facility and other important companies in the value chain, including PARO, BP, and Linde. The AMA facility's objective ...

GIDARA Energy is a pioneering company that specializes in adding value to various types of waste feedstock. Our innovative HTW ; technology is engineered to efficiently convert a wide range of waste materials into high-quality sustainable products.. GIDARA Energy not only tackles the pressing issue of waste management but also contributes to a more sustainable and ...

Aan de Torontostraat in de Botlek gaat GIDARA Energy een vergassingsinstallatie bouwen, waar het niet-recyclebare afvalstromen zal verwerken tot duurzame methanol. Eerder maakte het bedrijf bekend een gelijke fabriek in Amsterdam te willen realiseren. Ceo Wim van der Zande van GIDARA stelt nog veel meer

GIDARA Energy's gasification technology enables the transformation of waste into valuable circular chemicals, reducing reliance on finite fossil resources and minimizing environmental impact. Regulatory Compliance. With an evolving regulatory landscape emphasizing bio-based plastics, gasification provides a flexible pathway to meet regulatory ...

GIDARA Energy is to build a Gasification Innovation Centre in Rotterdam together with TU Delft. The centre

Poland gidara energy

will have a pilot-scale gasification island where, from mid 2023, mutual research can take place on the "third generation" of HTW® gasification technology, with which biofuels can be produced from pure biomass/waste streams.

GIDARA Energy emphasizes maximizing reliability by utilizing the same size and configuration as applied in previous HTW® facilities, which were operational for more than 10 years. The AMA facility will produce around 87.5 KTA (kilotons per annum) of renewable methanol by converting non-recyclable waste equivalent to that of 290.000 households ...

Founded in 2019, GIDARA Energy focuses on green technologies, acting as a bridge between combined waste and biobased feedstocks and the sustainable fuels and circular chemicals market; creating an integrated, green, and sustainable business.

At GIDARA Energy, our commitment to sustainable and innovative energy solutions drives us to continually explore and refine our HTW® gasification technology. One of the key advancements in this area is the use of pelletized waste feedstock, which significantly enhances the efficiency and reliability of our gasification process. ...

Commissioning 1985 Years of Operation 1986-1997 Product Capacity 300 tonnes per day Methanol (~90 KTA) Utilized Feedstock Brown Coal, Sewage Sludge, Lignite, RDF, MSW, Wood, Coke, Plastic Residues The Berrenrath facility in Germany was commissioned in 1985 with the purpose of producing Methanol. Over the +10 years of operation, the plant achieved an ...

Schiphol, The Netherlands - GIDARA Energy is pleased to announce that it has secured a key environmental permit for its Advanced Methanol Amsterdam (AMA) facility, which is a major step forward in the company's mission of decarbonizing the industry. The environmental permit, granted by the province of Noord-Holland, allows GIDARA Energy to ...

SCHIPHOL, Nederland, 9 mei 2023 /PRNewswire/ -- GIDARA Energy is verheugd met de bekendmaking dat het bedrijf een belangrijke milieuvergunning heeft verkregen voor zijn Advanced Methanol Amsterdam ...

GIDARA Energy offers you its High-Temperature Winkler (HTW ®) technology for managing and repurposing waste sustainably. This technology upgrades various waste materials, extracting maximum value from them, which would otherwise contribute to environmental degradation. GIDARA Energy's three essential pillars are based on this advanced process.
