

What is the future of Poland's energy sector?

Coal dominates the power sector of Poland, where it is the largest source of greenhouse gas emissions and a major employer. While the country has experienced strong growth in renewable energy over the past decade, the future looks uncertain.

What is the energy transition in Poland?

Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly. In the latest, seventh edition of the "Energy Transition in Poland" report, Forum Energii presents the state of transition policy and a broader look at the overall process.

Why does Poland need a new power station?

Get in Touch Poland urgently needs to build new gas-fueled power stations and keep its coal-fired units going for longer to avoid energy supply shortages this decade, according to the country's grid operator PSE.

Will Poland decarbonise its energy sector?

Poland, where the complete phase-out of coal will take place within 30 years, is definitely one of such economies. The key role in the decarbonisation of the Polish energy sector will be played by PGE Polska Grupa Energetyczna, the country's largest power producer with market share of 40%.

What happened in Poland's energy transition in 2023?

Poland's energy transition is progressing, and 2023 was a year of real records. Although coal remains the main source of electricity production, its share in the mix fell to an all-time low of 60.5%, down 10 p.p. from a year earlier. Production from RES reached 27% for the first time.

Why is energy production increasing in Poland?

At the same time, energy production from natural gas increased, by more than 40%. This is a result of falling fuel prices and the flexibility of gas generation. Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly.

Energa is a group engaged in generation, sale and distribution of electricity and heat. Our services are received by almost 3 million customers, to whom we supply and sell the greenest energy in Poland. 18 percent of all energy going ...
